DIMENSIONS AND UNIVERSES

Collapsing Arbahan

Scale of Importance to Know: [1] Very High; [2] High; [3] Medium; [4] Low

1. DIMENSIONS AND UNIVERSES

DUE TO THE NATURE AND STRUCTURE OF UNIVERSES, THERE IS NO WAY TO BREAK APART THEIR COMPONENTS AND DEFINE THEM WITHOUT CONSTANTLY REFERRING TO OTHER ASPECTS OF UNIVERSES YET TO BE DEFINED. MORE THAN ONE READ-THROUGH WILL HELP TO CONNECT THE MANY ASPECTS INTO COHERENCY.

For in-depth explanations of "Unknowable," "Themes," "Participants," "Life Units," "Supreme Priests," etc., to augment what is read below under DIMENSIONS AND UNIVERSES, refer to:

Page 8, about the Great Oracle and Supreme Priests

Page 12, about Life and Life Units

Page 29, about "Unknowable"

1.1 [2] LOGIC IS THE UNDERLYING RULE OF THIS AND ALL UNIVERSES.

1.1.1 [2] Logic keeps everything moving in a systematic and regular pattern, and it dictates everything that happens to matter and energy in their intra- and interaction. An exception is when a powerful single or collective intelligence¹ temporarily alters the pattern through supersedure.

¹ Intelligence, in this context, means "directed vectors," without regard to *what* is directing.

1.1.2 [2] Logic, as it affects matter and energy in their basic manifestations, was formulated and is now generated by all Life. After the beginning, it is continued unconsciously and automatically. Its laws provide the foundation upon which a universe is created. It relates together all universes and their comprising dimensions.

1.2 [3] TIME MOVES BOTH PARALLEL AND LINEAR; PARALLEL AS INFORMATION AND CONFLICT AS STORED IN "UNKNOWABLE;" LINEAR AS BEING CONTINUOUSLY CREATED.

1.3 [2] DIMENSIONS ARE THE STRATA OF WAVELENGTHS GENERATED THROUGH THE CONSCIOUSNESS EVOLUTION OF LIFE FORCE. (Refer to the section on LIFE, starting Page 12).

1.3.1 [2] Dimensions are unbounded by any artificial packages, such as universes, so may be experienced by any Life Unit aware and responsible enough to perceive.

1.3.2 [2] Dimensions have beginnings but would only end should Life Force cease to exist.

1.4 [2] A UNIVERSE IS LIKENED TO A SEALED VESSEL, THE CONTENTS OF WHICH ARE DETERMINED BY WAVELENGTHS AND WHAT IS CONSIDERED AS SUBSTANCE.

1.4.1 [2] Each universe is a package containing a finite number of wavelengths and their resonances, designed to form a play ground for Life Units that collect within its boundaries.

1.4.1.1 [2] A universe is a plane of existence including all that makes it a complete package onto itself.

1.4.2 [2] A universe takes its definition through forming around a series of dimensions, not limiting the dimensions but limiting the universe.

1.5 [1] UNIVERSES CONTAIN VAST, WEB-LIKE STRUCTURES, THE STRANDS OF WHICH CONNECT TOGETHER EVERYTHING IN THE UNIVERSE CONSIDERED TO BE SUBSTANCE.

1.5.1 [1] Life Units are not directly connected to web strands.

1.5.2 [1] There are many hubs, i.e., dense collections and intersections of web strands.

1.5.3 [1] Life Units may influence, and be influenced by, web strands.

1.5.3.1 [1] A Life Unit may have its individual influence magnified significantly in its universe by being in the vicinity of a web hub. Vicinity to one or more hubs in a particular universe may result from:

1.5.3.1.1 [1] Proximity to physical location

1.5.3.1.2 [1] Spiritual, or Life Unit proximity resulting from a desire to influence strong enough to make a connection, even across whatever is called "distance" in that universe

1.5.3.2 [1] Theoretically, one Life Unit could influence every hub in a universe. Such a Being would be as a god.

1.5.3.3 [1] Web strands telegraph information that can be experienced by Life Units.

1.5.3.3.1 [1] Units may use the web strands to broadcast information.

1.5.3.3.2 [1] Broadcasting and intuition-gathering (information-gathering) are the primary ways Life Units use the web structure to influence and be inspired.

1.5.3.4 [1] A UNIVERSE'S WEB STRUCTURE IS LIKE A GREAT, MUSICAL INSTRUMENT, A HARP, IF YOU WILL, WITH STRANDS RUNNING EVERY WHICH WAY. UPON IT, LIFE UNITS WITHIN THE UNIVERSE PLAY OUT THEIR INCLINATIONS, WHILE "UNKNOWABLE" PLAYS OUT ITS THEMES.

1.6 [2] UNIVERSES ARE CYCLIC AND THUS HAVE BEGINNINGS AND ENDINGS.

1.6.1 [2] Life Units, as such, generally make at least some contributions to the Themes that transpire within each cycle. Yet only Life Units that become Beings make individually significant contributions toward making a cycle rewarding and beneficial to Life. Life Units tend to be robotic, whereas Beings are more autonomous.

1.6.2 [3] At the end of a universe, everything that was considered substance in that universe either dissolves or is reshaped and repatterned for new use elsewhere.

1.6.3 [3] Neither "Unknowable" nor the Great Oracle are affected by these endings or metamorphoses.

1.7 [2] UNIVERSES ARE OUT OF PHASE WITH EACH OTHER

1.7.1 [2] The primary difference between universes is what is considered substance. The substance of each is established, monitored and regulated by properties peculiar to wavelengths (dimensions). Wavelength focuses meta-electricity to power the web of interactions, define forms, and delimit boundaries. (The section on Meta-Electricity begins Page 26).

1.7.2 [2] The ultimate power of design and assignment of wavelength to a universe comes from Life Force. Control within universes may come from any number of sources and is generally unregulated as to mere internal interaction except through Logic (see Page 4) and the mechanism of "Unknowable."

1.7.2.1 [2] Most Life Units find some wavelengths more comfortable than others, and this consideration determines in which universes they will be willing to participate.

1.7.2.2 [2] Life Units that find themselves in universes unacceptable to their tolerance demonstrate various degrees of unhappiness from just being depressed to complete, catatonic insanity, the spiritual equivalent of death.

1.8 [3] EACH UNIVERSE HAS ITS OWN TIME CLOCK

1.9 [2] TIME, SPEED AND WAVELENGTHS ARE RELATED TO EACH OTHER IN A GIVEN UNIVERSE.

1.10 [4] HYPER SPACE IS ACCOUNTED FOR AS "THE CORRIDOR BETWEEN UNIVERSES." HYPER SPACE IS NOT EASY TO NAVIGATE.

1.11 [4] BLACK HOLES, SUNS, STARS AND LIVING PLANETS ARE "THOSE POINTS WHERE TWO OR MORE UNIVERSES TOUCH."

1.11.1 [4] Black holes are universe exit drains, while suns, stars and living planets (planets with active interior fission) are universe entrance points. To each black hole in one universe, there is a corresponding sun, star or living planet in the universe connected at that point. Dead planets, asteroids and the like are simply free bodies in whatever universe they are in. Quasars are connections coming to an end.

2. GREAT ORACLE AND SUPREME PRIESTS

2.1 [2] THE GREAT ORACLE IS NOT SUBJECT TO THE RULES AND REGULATIONS DICTATED BY "UNKNOWABLE."

[2] It has a separate existence, pan dimensional and pan universal, which has as its sworn duty the preservation of the integrity of Life Units in general and the Life Force in particular. It does so through the use of rogue Life Units implanted strategically within dimensions and universes, which remain sleepers until activated for specific assignments. In this way the Supreme Priests of the Great Oracle can assure that Life Units, already drained of their inherent powers, aren't rendered complete slaves, and safeguard that unacceptable futures² are never arrived at.

2.2 [1] PURPOSE OF THE GREAT ORACLE, AND REASON FOR SUPREME PRIESTS

2.2.1 [1] "Unknowable" is not an omnipotent entity but is an extremely highly sophisticated computer that does its job of plotting futures very thoroughly and unequivocally. Occasionally "Unknowable's" concoction of unresolved situations, with its resultant Theme dramatization, would unduly prejudice participating Life Units without a sufficiently enriching culmination.

[1] Once such Themes are set up and put into operation carrying the full force of "Unknowable," they can only be altered through intercession by rogue Life Units and Supreme Priests of the Great Oracle.

² An example of an "unacceptable future" would be a Theme direction which calls for its participant Life Units to be inescapably caught in a condition which reduces their awareness, intelligence, judgment and hope. (See sections 3.3 through 3.7.)

2.2.2 [1] The operating principles of "Unknowable" permit it to take direct action against Life Units without going through Life Unit agents. This is also true for the Great Oracle. Yet, because of its Priests' creed that self-determinism of Life Units must be preserved and not overpowered unnecessarily, the Great Oracle seldom takes direct action without going through Life Unit agents planted within a Theme.

2.3 [1] OCCASIONALLY, SUPREME PRIESTS TEMPORARILY LEAVE THE GREAT ORACLE, AND THEIR INHERENT POWERS, TO ENTER A THEME DRAMATIZATION AS ROGUE LIFE UNITS.

2.3.1 [1] They seldom do this unless the situation is most desperate and on the brink of ruination. Every time a rogue is effective in significantly changing the future, whether for good or not, traumatic ripples sweep through the pre-set, timed future and its attendant events.

2.4 [1] WHEN AN "UNKNOWABLE" THEME ENDS, IT TAKES A PERIOD OF TIME BEFORE A NEW THEME IS WORKED OUT, PROGRAMMED AND EFFECTED.

2.4.1 [1] During that span, participants are left to fend for themselves, with much disorientation and disorder. At such times all Life Units become rogues.

2.4.1.1 [1] All Life Units become free to decide, before the next Theme cycle begins, whether to subscribe to the game plan tenets and programming of "Unknowable," to remain rogues and go it on their own, or become Initiates to the Great Oracle.

2.4.1.1.1 [2] Most choose the safe route, i.e., conformity with whatever "Unknowable" deems right. Many of the tougher ones choose to become rogues because of the potentially lucrative aspects associated with the category. Only a small percentage decide to follow a spiritually higher path as Initiates.

2.4.1.1.2 [1] Choices made are mostly regulated by:

2.4.1.1.2.1 [1] A Life Unit's ability and willingness to confront the spectrum of existence

2.4.1.1.2.2 [1] Exposure to, and opinions regarding, personal responsibility and self determinism

2.4.1.1.2.3 [1] The degree of need to delegate responsibility for activities and their consequences elsewhere than self

2.4.1.1.2.4 [1] The composite regard for the well being of fellow Life Units, and degree of interest in aiding that well being

2.4.1.1.2.5 [1] Amount of value placed on own personal integrity and that of others

2.4.1.1.2.6 [1] Stand and philosophy concerning overt opportunism

2.4.2 [1] During such interludes, fruits of the Great Oracle become especially evident, as Supreme Priests shower nurturing inspiration upon confused Life Units of every state and potential.

2.4.3 [1] When a new Theme is set up, programmed, assigned, and in operation, many former participants-turned-rogue are absorbed into the new Theme.

2.4.3.1 [1] Many Life Units are not absorbed. In a multitude of ways these are weeded out of the dramatization, to be replaced by more amenable Units.

2.4.3.2 [1] Rogues capable enough not to be weeded out are on their own and never quite fit into the Theme, i.e., programmed scheme of things.

2.4.3.3 [1] Some rogues will be approached for initiation into the Order of the Supreme Priests, as they are more aware than the average Theme participant Life Unit.

2.5 [1] IT IS THE ASSUMED TASK OF THOSE WHO FOLLOW THE GREAT ORACLE AS SUPREME PRIESTS TO MAKE PARTICIPANT LIFE UNITS AWARE OF THE REAL ORDER OF THINGS AND THE HEALTHIER PRIORITIES OF LIFE.

2.5.1 [1] Supreme Priests are enlightened Life Units who have united for defense against absorption into the precipitous trap of uncontrolled Theme dramatization. They actively seek out other Units who wish to help and who are disenchanting by existing conditions in whatever dramatization they happen to be. Once potential candidates are located, these exceptional Units are initially and unwittingly tutored to increase their awareness until reaching a point far superior to their compatriot participants.

2.5.2 [1] Next, the newly budding Units are siphoned out of the dramatization for further enlightenment within the Great Oracle, itself.

2.5.3 [2] IF ANY OF THESE UNITS ARE UNABLE TO SHAKE THEIR LOYALTIES TO "UNKNOWABLE," THEN BY THEIR OWN WILL THEY RETURN TO THE DRAMATIZATION AND RESUME THEIR PREVIOUS ROLES IN WHATEVER WAY THEY CAN, OR BECOME ROGUES.

2.5.3.1 [2] Continued participation by Life Units returning to Themes as participants becomes more difficult than it was before, since they have extraordinary knowledge and heightened awareness and sense of responsibility far in excess of their compatriots. At worst they become enigmas and at best become shining lights, passing on some of what they have learned to their fellow participants.

2.5.3.2 [2] THOSE LIFE UNITS WHICH DO NOT MAKE THE TRANSITION AWAY FROM LOYALTY TO THE "UNKNOWABLE" ARE NOT BANNED FROM EVER REENTERING THE GREAT ORACLE TO RESUME ENLIGHTENMENT. THEIR ONLY BARRIERS, INITIALLY, ARE OF THEIR OWN DEVISE.

[2] However, the longer they wait after their initial indoctrination the more difficult it becomes for them to reenter. This is because they have given "Unknowable" an opportunity to instill and install safeguards within their Primary Thought against such an action. (Such can also happen to rogues if they let themselves be influenced by "Unknowable" through their use of vices. See section 4.7.6.4.)

2.5.4 [1] THOSE INITIATE LIFE UNITS WHO ARE ABLE TO VOID THEIR LOYALTIES TO "UNKNOWABLE" CONTINUE ON IN THEIR TUTELAGE AND EVENTUALLY BECOME SUPREME PRIESTS THROUGH MANY GRADES OF ENLIGHTENMENT.

[1] These Life Units, or Beings (as they are now entitled to be called), must now follow the Great Oracle as it is their only oasis of self determinism with high purpose.

2.6 [1] OF ALL LIFE UNITS AND BEINGS, SUPREME PRIESTS ARE MOST RESILIENT OF ALL LIFE UNITS ARE THE MOST RESILIENT AND MOST ABLE TO CREATE AND COMMAND THEIR OWN DESTINIES.

3. LIFE

3.1 [1] LIFE, AS A SINGULAR AND COLLECTIVE FORCE, IS PROGRESSING THROUGH AN EVOLUTION VIA DIMENSIONS OF ITS OWN CREATING, WITH THE EXPLICIT PURPOSE OF ENHANCING ITS SINGULAR AND COMPOSITE AWARENESS.

[1] As awareness increases, intelligence emerges as an evolutionary product. Intelligence subdivides and goes hand-in-hand with judgment, allowing Life, itself, to subdivide into Life Units, each capable of some measure of judgment.

3.2 [1] THROUGH LIFE'S EVOLUTIONARY PROCESS, MANY FISSURES OCCUR IN THE GENERAL TREND.

3.2.1 [1] These fissures in Life's evolutionary process account for dimensions. Life Units, once separated from Life Force through judgment, pursue evolution in whichever dimension(s) they can tolerate or which they enjoy. Within each fissure or dimension reside Life Units that have arrived and stayed, along with those that are still following the original Life Force purpose of progression and are just "passing through," so to speak.

3.2.2 [1] Separations between dimensions are, in themselves, artificial, and are only the product of the composite unwillingness of the Life Units of one fissure to recognize the existence of others. Some Units selectively recognize certain dimensions but not others. The interactions of dimensions and Life Units and their various combinations of interactions make possible the things that are present today, and account for many things needing to be resolved, and, subsequently, account for a future (not necessarily *the* future) already plotted out.

3.3 [2] LIFE FORCE, AS AN ENTITY, MOVES IN THE DIRECTION OF GREATER AWARENESS BUT HAS NOTHING OF WHICH TO BE AWARE EXCEPT ITSELF OR ITS OWN PRODUCTS.

3.3.1 [3] The Force initially becomes aware of thoughts and their multifacets. After the first thought is created, recognized and inspected, more thoughts erupt followed by still more in an increasingly torrential flow, steadily increasing in momentum.

3.3.2 [3] The inspection and categorizing of these thoughts bring about the general mechanism of intelligence that naturally starts at a very low wattage. As the use of the mechanism of intelligence increases and its function is more or less understood a new variable emerges.

3.3.3 [2] As Life Force becomes more aware of thoughts, and intelligence allows it to do more things with thoughts, such as comparing and contrasting them, the Force begins to get more progressive and starts making decisions and opinions about thoughts, awareness, intelligence, decisions and opinions, both new and formerly created. Thus judgment emerges on the scene.

3.4 [1] WITH THE ADVENT OF JUDGMENT CERTAIN SECTIONS OF THE LIFE FORCE HITHERTO INSEPARABLE BECOME INDIVIDUAL LIFE UNITS.

3.4.1 [2] The only prerequisite to become a Life Unit is having the capability to produce thought and be able to exercise judgment enough to decide on separation.

3.4.2 [1] SEPARATION IS BROUGHT ABOUT FOR EACH UNIT INSTANTANEOUSLY BY A THOUGHT REGARDING BEING A "SELF," FOLLOWED IMMEDIATELY BY THE REALIZATION THAT IT "IS" NOW A SELF, FOLLOWED BY A FLICKER OF HOPE FOR A FUTURE.

3.4.2.1 [1] This sequence starts the ball rolling, so to speak, for the Life Unit. It always remembers where it came from but never knows whether it is leaving or returning. It just knows it has to have hope. "Self" is the thought that the Life Unit identifies with, and "hope" is its vectorial direction.

3.4.2.2 [1] Life Force does not rely on "hope," because its only direction is greater awareness. However, Life Units rely on hope as collectively magnified into "future."

3.4.2.3 [2] Since a major part of future consists of the reenactment of past unresolved problems and incidents, Life Units in general have an interest in keeping the past at least somewhat unresolved. This vested interest stems from a deep and basic fear held by Life Units that the future could dissolve and dissipate at any moment, if there is nothing unresolved to be projected ahead as inspiration to hope and as maker of a future.

3.4.2.4 [2] Future, as created through hope by a single Life Unit, is fragile indeed and is easily superseded by an agreed future conjured by a group of Life Units or, and especially, one manufactured by "Unknowable."

3.4.2.4.1 [3] Attempts can be made to alter a future, since actual future remains nebulous until becoming finalized into past.

3.4.2.4.2 [2] However, changing a future created by "Unknowable," called a Theme, is another story. If a future, or Theme, is initiated by "Unknowable" in its insatiable quest to provide opportunity to resolve conflict, then alteration is almost impossible. When a Theme is disrupted or otherwise runs contrary to plan, "Unknowable" provides alternate means to ensure Theme execution. Eradication of an entire Theme is a possibility should things get unacceptably out of its control.

3.5 [1] JUDGMENT AND STATE OF BEING

3.5.1 [1] All living things are aware and able to make decisions and exert judgment. However, across the entire spectrum of life, these abilities are put into use only to the degree that they are not absorbed or canceled by organic and other autonomic functions.

3.5.2 [1] A Life Unit's state of being is regulated by its willingness and ability to hope, with hope, by definition, projecting a future.

3.5.3 [1] Awareness, intelligence, judgment and hope act as a closed circle which expansion of diameter is a barometer measuring the advancement of life. The failure of all four factors to expand equally insures that the diameter will not increase and the being, or Life Unit, not advance.

3.5.4 [1] Humans are in some different and some of the same dimensions as animals, which in turn are in some different and some of the same dimensions as insects, that are in some different and some of the same dimensions as plants, which are in some different yet some of the same dimensions as rocks, etc.

3.5.4.1 [3] The greater the state, the more previous dimensions are remembered and carried forward through subsequent steps *ad infinitum*.

3.5.4.2 [1] The greater a being's (Life Unit's) awareness, intelligence, judgment and hope, the more accelerated the evolutionary process becomes, and the more willing and able that being becomes to expand into the next steps.

3.6 [1] RESPONSIBILITY

[1] Responsibility automatically increases to the degree that these four factors—awareness, intelligence, judgment and hope—are sharpened. Irresponsibility is a clear indication that the being has yet to develop those four factors. Still, if irresponsibility is noted in another being or Life Unit, one should realize that the stages he/she/it has left behind are lower. What you see is a progression.

3.7 [1] EDUCATION

[1] Education should always stress the development of awareness, intelligence, judgment and hope.

3.8 [1] FOR LIFE UNITS TO BREAK AWAY FROM BEING "ROLE PLAYERS," OR "PARTICIPANTS" IN THEMES, THEY REQUIRE

BASIC DEPROGRAMMING CONCERNING ALL ASPECTS OF LIVING, RIGHT DOWN TO THE SMALLEST DETAILS.

3.8.1 [1] Before Life Units can ever fully pull away they must also recognize that their "selves" are not definitive "thoughts" but thought-creating Entities.

3.8.2 [1] Life Units originally formed around individual thoughts because those thoughts were their only experience and only tangible identity. Once Life Units no longer consider themselves and their conduct controlled by the "selves" or basic thoughts, they can escape unknowing participation in Themes. Consequently, they have more freedom and self-determinism.

3.9 [1] BEINGS WHO ENTER A THEME AS ROGUES AND NOT AS PARTICIPANTS MUST BEWARE, FOR THEIR JOURNEY IS DANGEROUS.

3.9.1 [2] Rogues have knowledge and abilities that threaten the very pillars upon which "Unknowable" is set (namely "reality," tailor-made as part of "Unknowable's" Theme). Thus it is prudent for a rogue to work within the boundaries of a Theme in which it finds itself, while taking care of business.

3.9.2 [1] IT IS AN AXIOM OF THE "UNKNOWABLE'S" DEFENSE DEPARTMENT THAT THE SIZE OF MOBILIZATION IS DIRECTLY PROPORTIONAL TO SIZE OF PERCEIVED ATTACK AGAINST IT OR ITS THEMES.

3.10 [2] THERE IS ANOTHER SEGMENT OF BEINGS AND LIFE UNITS BESIDES THOSE INVOLVED WITH THE GREAT ORACLE OR PARTICIPANTS IN THEMES.

3.10.1 [2] These Beings and Life Units have evolved by various means and devices to greater states of awareness concerning the workings and "realities" of "Unknowable." THE GENRE IS CALLED "THE UNHOLY HORDE." Though not necessarily under any formal organization, their interests are mainly for self, and they use their knowledge to dupe participants for the explicit purpose of making themselves more powerful than the role players. In this way they attempt to sway direction of Themes.

3.10.2 [2] The Unholy Horde's interests are mainly centered upon material gain and the attendant safeguards necessary to preserve it into the future. The Unholy Horde has a continuous running battle with "Unknowable," because the Horde relentlessly tries to disrupt Themes.

3.10.3 [2] As artificial time passes (time continuum created by "Unknowable" through which the clocks of the universes are synchronized), all the unresolved situations created by this running battle become echoed into future Themes to be worked out. In this way, new Themes become heavily tainted with violence, duplicity and upheaval.

3.11 [1] LOVE, AS AN AESTHETIC CONCEPT, CAN ONLY BE EXPERIENCED BY LIFE UNITS AND BEINGS WHO CAN PLUMB

ABOVE THE THEME AND EXPERIENCE THE BENEFICENT, NURTURING AND OTHERWISE SUSTAINING FLOW OF LIFE FORCE. THUS "LOVE," AND "NURTURE," ARE SYNONYMOUS. (SEE 3.12 BELOW).

3.12 [1] THE COMFORT OF LIFE IS TO CONSUME AND BE CONSUMED. THIS TENDENCY INCLUDES FEEDING OFF LIFE UNITS, LIFE FORMS AND DIVERSE BYPRODUCTS OF EXISTENCE AS WELL AS GIVING OF ONESELF TO PROVIDE SUSTENANCE FOR OTHERS.³ "NURTURE" IS DEFINED AS THE HIGHEST PURPOSE POSSIBLE: THE FURTHERANCE OF "LIFE" REGARDLESS OF AGREEMENT, REASON, JUSTIFICATION, OR COGNIZANCE OF DOING SO.

3.12.1 [1] The Font of Life, or Life Force, is an eternal and infinite source of nurture. Its product can be consumed forever without there being any letup in the generous supply of its "Milk."

3.12.2 [1] Each Soul, or Life Unit, is an Outlet of this "Milk of Life." In other words, Life Units function as "teats" of Life Force.

3.12.2.1 [1] Every Life Unit is as if covered with its own potential nurturing "teats" to conduit the "Milk of Life."

3.12.2.2 [1] Regardless which gender the Soul's life form takes, sex organs as expressed in material forms are mere reminders, through very low order manifestations, of real nurturing. Their use alone to satisfy nurturing needs is not satisfying.

3.12.2.3 [1] In some cultures, nurturing has been considered an attribute of females and unmanly for males. Thus females give, or nurture, and males take, or consume.

3.12.2.3.1 [1] However, such severe separation is unnatural, established as a control mechanism to select out and enslave one gender.

3.12.2.3.2 [1] Primordially, both sexes, as Life Units, "feel" they must nurture and be nurtured to find reassurance as members of whatever race or species in which they abide.

3.12.3 [1] The degrees of nurturing allowed by Life Units upon themselves by others is regulated through opening or closure of teats. Meanwhile, Life Units feel compelled to search out open teats of other Life. Life is built from the manifestations.

[1] Some Souls, or Life Units, attempt to fully control other Souls so as to keep the teats forced open. Some fight furiously from giving out nurturing, debarring

³ Sections 3.11 and 3.12 were added in April, 1992, and may or may not be a product of Collapsing Arbahan inspiration.

encroachment on their teats by most, if not all, other Life Units. Some Life Outlets have their nurturing teats fully open, allowing any amount of consumption. This may occur voluntarily, or it may be the result of loss of will or ability to stem the flow. These are just a few manifestation examples. (Willingness to nurture dissipates hate. See Hate, Section 3.13 below.)

[3] A mother feeding her family will normally dish them more than just portions from the basic food groups. The love, or nurturing, she includes is unseen but with few exceptions is strongly felt. In later years, her children cannot understand why it is that going to restaurants does not make them happy. They look forward to going, but once there the frowning or indifferent waiters and waitresses seem to do everything in their power to mess up orders and cause upsets. Yet each of mother's children knows of a restaurant where they have a favorite waiter or waitress, a person you can count on for a warm smile (and nurturing, the invisible ingredient). There are countless other examples.

[3] A father, or other male figure, also nurtures. A father or big brother helps a youngster with his sports, giving the child encouragement and a lifetime of accumulated knowledge and experience from which to draw. Later the child grows up, possibly still pursuing the sport actively. Yet the adolescent eventually must look outside the home or other, original source for help and nurture. Of those sources found, the most memorable and appreciated are those that approximate the prior support and nurture. Again, there are many other examples.

3.12.4 [1] No matter what Life Force does through its filtering into the realms of existence, or dimensions, the dynamics of its Life Units' activities are focused on obtaining nurture and regulating that given out by themselves. The least healthy nurture is through consumption of physical things. The most beneficial is taken directly from the Life Font, Life Force being the Source and Composite of Life Units and foundation of all things.

3.12.5 [1] Nurture from and to other Life Outlets develops what we know as interpersonal communications/relations. This aspect needs to be fully understood and appreciated by Mankind, the highest cognitive manifestation of Life Outlets/Life Units (known to Man), if a higher plane of existence is to be approached. A lack of this knowledge has resulted in much past calamity and many unsatisfactory interpersonal relationships. We now have it within our power to reverse these bad and otherwise unfruitful trends, allowing the future to develop less brutally.

3.12.6 [1] Rules of thumb are:

3.12.6.1 Rely most on nurturing from the Life Font and from self.

3.12.6.2 Rely somewhat less on nurturing from other Life Outlets a.k.a. Life Units, tolerating the variety of flows or lack thereof. Be discriminating, since the more one takes from a source, the more like that source one tends to become.

3.12.6.3 Rely least of all on consumption of material things to fulfill nurturing needs.

3.12.6.4 Never get any of these aspects of nurturing confused, one with another.

3.13 [1] HATE⁴ IS A META-ELECTRICAL, LIFE UNIT-MANUFACTURED QUANTITY AND QUALITY THAT ENSURES SEPARATION BETWEEN LIFE UNITS. HATE'S PURPOSE IS TO CREATE A BARRIER/FILTER USED TO INHIBIT OR OTHERWISE CONTROL OTHER LIFE UNITS NURTURING FROM, OR KEEP THEM ON THE OUTSIDE AND UNABLE TO INSEPARABLY JOIN WITH, LIFE UNITS INVOKING IT. (See Nurturing, Sections 3.11 and 3.12 above; Meta-Electricity, Section 5.2, Page 26.)

3.13.1 [1] The adage "You always hurt the one you love" should really be phrased "You always hate the one you love."

3.13.2 [1] The more Life Units try and "pull together," the more they automatically feel the need to "pull apart."

3.13.2.1 [2] There is a basic fear that pulling together will cause two or more Life Units to literally join inseparably into one Unit.

3.13.2.2 [2] In some cultures and dimensions, the institution of "marriage" between Life Units is used to symbolize this potential joining.

3.13.3 [1] Hate is virtually created continuously by Life Units from the time they separate from Life Force or other Life Units.

3.13.3.1 [1] An infinite number of mechanisms have been devised to facilitate hate production.

3.13.3.2 [2] An infinite number of mechanisms have been devised to facilitate invocation and usage of hate.

3.13.4 [1] Hate's mass and significance of intent accumulate and may be used in any quantity by Life Units and by "Unknowable" to further purposes in addition to mere insurance of separation.

3.13.5 [1] Life Units should be aware of the sources, build-up and manifestations of hate and knowingly refrain from invoking or using its power. Its use is a sure key to connection with Misconsciousness, and thus "Unknowable." (See Misconsciousness, Section 4.7, Page 23. Nurture dissipates hate, see Section 3.12.3, Page 16.)

⁴ Section 3.13 was added in May, 1993, and may or may not be a product of Collapsing Arbahan inspiration.

3.14 [1] LIFE UNITS CAN SPLIT AND BECOME MORE THAN ONE LIFE UNIT THE SAME WAY AS LIFE UNITS SEPARATE FROM VIRGIN LIFE FORCE.

3.14.1 [1] Once this happens, the Life Units may either evolve separate consciousness, or share the same one with or without minor variations.

3.14.2 [1] Even if the same consciousness is used initially, the individual Life Units will tend to differentiate more and more in time. In most cases they will lose conscious awareness of each other on the Life Unit level but will always retain a subconscious, primal identification with the other (or others) and may still unwittingly share thoughts.

3.14.3 [1] Life Units can help (nurture) others, and ask for same, across the dimensions.

3.14.3.1 [1] They can also help (nurture) themselves by directing their attention into the Meta-Conscious and Metaphysical to direct Meta-Electricity with thoughts, or prayers, and thus alter untenable situations, or otherwise further purposes and desires.

(See related Section 1.5, Page 5, concerning universal web structure; Section 4.1, Page 20, for Meta-Conscious; Section 5.2, Page 26, for Metaphysical and Meta-Electricity.)

3.14.3.2 [1] Life Units connected to protoplasm lines can act, i.e., influence, through these lines. This includes the giving and asking for help (nurture). Protoplasm lines are Metaphysical, Life Unit lines of descent through the Life Unit separation process as discussed above.

[1] The protoplasm line should not be confused with the biological line. The biological line of descent, and manifestations thereof, are controlled by a life vessel-generating aspect of “Unknowable.”

4. CONSCIOUSNESS

4.1 [1] META-CONSCIOUSNESS IS THE STATE ABOVE CONSCIOUS THAT IS ALL KNOWING, WHAT WE THINK OF AS AN ATTRIBUTE OF GOD, BUT NON-VOLITIONAL.

4.1.1 [2] Meta-Consciousness lacks direction of its own and is simply the "soup" in which Life Force is immersed.

4.1.2 [1] Meta-Consciousness is the realm of the free being, unencumbered by consciousness or mental processes.

4.1.3 [1] To the Meta-Consciousness the conscious is a fog, and to the conscious the Meta-Conscious does not exist. However, Life Units retain an impression of the realm of the free being even after becoming completely enveloped with consciousness. The memory sustains.

4.2 [1] CONSCIOUSNESS IS "FOCUSED AWARENESS OF DIMENSIONS AND UNIVERSES WITH ANY DEGREE OF MOTIVATION, WHERE A LIFE UNIT HAS THE DESIRE TO KNOW."

4.2.1 [1] This level deals mostly with the understanding and maneuvering of Meta-Electricity and entails development of mental processes/machinery. (For information on Meta-Electricity, see the section starting Page 26).

4.2.2 [1] Consciousness is the extension of active intelligence outward across the dimensions from a Life Unit. How far it extends depends on a number of factors, the main three being:

4.2.2.1 The intellectual prowess of the Unit, regulated by the Unit's utility of its Life Force potential

4.2.2.2 The relative strength of the misconsciousness as it affects the Unit (see Paragraph 4.7 on Misconsciousness, Page 23)

4.2.2.3 The magnitude of the desire to know and experience new vistas as demonstrated by the use of perceptions

4.2.3 [1] Theoretically, consciousness could reach to the shore of the Meta-Conscious and imperfectly approach the cognizance of Life Force. Falling in the reachable category is all that can be known of Meta-Electricity concerning material and energy existence across all dimensions and universes.

4.2.4 [1] Consciousness funnels up like an inverted pyramid, its vertex a Life Unit as part of Life Force, and its potential outer limits the borders of infinite existence, i.e., all that which Life Force has created during its evolution.

4.2.4.1 [1] The sides of the pyramid for each Unit are at varying angles from the base (vertex, or Life Unit) and have variable depths of penetration into inhabited or other dimensions (and away from Meta-Consciousness and Life Force), one Life Unit from another, depending on the three factors mentioned above in Paragraphs 4.2.2.1 through 4.2.2.3. (This "pyramid" idea is figurative so as to get the concepts into the more comprehensible realm of geometry).

4.2.4.2 [1] The acuity of the angle of a pyramid's sides determines the potency of the respective Life Unit's focused attention. The wider the angle the more varied and scattered is the attention. Yet, if too narrow, attention becomes monomaniac and easily fixed.

4.3 [1] INCREASING CONSCIOUSNESS BY A LIFE UNIT IS POSSIBLE. THE NEXT THREE FACTORS, IF CHANGED AS FOLLOWS, WILL AUTOMATICALLY INCREASE CONSCIOUSNESS.

4.3.1 The Life Unit expands its utility of its Life Force potential.

4.3.2 The strength of misconsciousness is weakened as it affects the Unit.

4.3.3 The Unit continues to "open its eyes" and experience, observe, take in and analyze through use of perceptions, both dimensional and Life Force-related. (Almost going without saying, of the two, use of Life Force-related perceptions is the most important).

4.4 [1] INCREASING META-CONSCIOUSNESS IS DONE DIFFERENTLY.

4.4.1 [1] Meta-Consciousness is hinted at vaguely, generally, and sometimes specifically by the conscious. However, the Meta-Conscious state cannot be arrived at by doing the steps outlined above in 4.3.1 through 4.3.3.

4.4.2 [1] Higher Meta-Consciousness is arrived at by rekindling ones memory of the free being state. The journey back to Meta-Consciousness, though it may seem easy, is not necessarily so. There are many traps and pitfalls on the voyage. The obstacles could remind one of the fabled Trials of Hercules, so the endeavor should never be undertaken casually.

4.4.2.1 [1] To arrive at Meta-Consciousness stably you must first cross the fast flowing river that is the conscious. There are stepping stones below the surface of this river, but one must watch each step and fortify the last step before taking another.

4.4.2.2 [1] Occasionally there are islands, where one can either remain on the higher plateau or simply rest up before going on.

4.4.2.3 [1] The secret to succeeding, besides "watching your step," is to BE FULLY COGNIZANT OF THE MEMORY OF THE FREE BEING STATE. THAT IS THE BEACON or HOMING DEVICE, WITHOUT WHICH YOU WILL SOON BE LOST IN THE CURRENT of present and past consciousness.

4.4.2.4 [1] The state of free being is the absolute, irreducible, bottom line of ones self. It is YOU without thought or other mental interplay, reactions, dreams or desires.

4.4.2.5 [1] Every extra aspect attached to the irreducible YOU will work to keep one from obtaining Meta-Consciousness.

4.4.2.6 [1] Do not expect the discovery of the free being state to be fast. In most cases it will demand extensive attitudinal changes, since most values are designed to chain Life Units to the desire for increased consciousness at the expense of Meta-Consciousness. This desire has been considered necessary to keep a Life Unit in a dimension and from bouncing, unanchored, all over Creation.

4.4.2.7 [1] Keep in mind that it is not attaining Meta-Consciousness that should be your goal, as its attainment would leave you (no pun intended) unconscious. Instead, it is the mental decluttering and the getting re-acquainted with YOU that should be your goal. For you carry the imprint of both Consciousness and Meta-Consciousness, each of which grows more evident and tangible in its own unique way, the closer you get to YOU.

4.4.2.8 [1] As mentioned earlier, here again for emphasis, CONSCIOUSNESS IS FOG TO META-CONSCIOUSNESS, AND TO THE CONSCIOUS, META-CONSCIOUSNESS DOES NOT EXIST.

4.5 [1] THE LEVEL OF CONSCIOUSNESS ANY ONE LIFE UNIT ATTAINS IS NOT COMPLETELY STABLE AND WILL TRY TO DIMINISH.

4.5.1 [1] Over time consciousness will settle lower in the inverted pyramid unless a sustained effort is made by the affected Unit to increase, or at least maintain, the level. The reason for this is a gravitational-type force that works to reduce consciousness. (See the paragraphs on misconsciousness starting with 4.7 below).

4.5.2 [1] However, once a level of consciousness is attained, even if lost it can be quickly regained unless extensive time has elapsed since the level was lost. Still, it is easier to regain a level, no matter how long since lost, than it is to attain a new level.

4.6 [1] NEW LEVELS OF CONSCIOUSNESS INVARIABLY RESULT IN A SUBSTANTIAL CHANGE IN THE VIEWPOINT AND REALITY OF A LIFE UNIT.

4.6.1 [1] Though the new level diminishes some Life Force potential by removing the Life Unit further from Meta-Consciousness, it makes it easier for the Unit to maintain former stages of consciousness.

4.6.2 [1] The most stable level held by a Life Unit is somewhat below the highest level attained. This "most stable" level rises at close to the same rate as any increase in the highest level of consciousness attained. It may rise disproportionately more or less.

4.6.3 [1] THE HIGHER THE STATE OF CONSCIOUSNESS THE MORE FRAGILE IT BECOMES, FOR CONSCIOUSNESS IS, AFTER ALL, AN ARTIFICIAL STRUCTURE BUILT HIGH ABOVE ITS FOUNDATION, LIFE FORCE AND META-CONSCIOUSNESS.

4.7 [1] MISCONSCIOUSNESS IS AN OPPOSITE TWIN OF CONSCIOUSNESS.

4.7.1 [1] Misconsciousness is derived from "Unknowable" and is also a pyramid, but its apex is the Life Unit and its base, or lowest point, extends down into the intellectual programming of "Unknowable."

4.7.2 [1] A gravitational force is also at work in misconsciousness, but it acts to siphon a Life Unit's consciousness and awareness down toward the control of "Unknowable."

4.7.2.1 [1] This siphoning, or gravitational force, negates much of the power and benefit derived by a Unit from increases in consciousness.

4.7.2.2 [1] Thus a participating Life Unit, in order to maintain individuality and independence, and strength of will, must work against a gravitational force that keeps attained consciousness low and the effects of misconsciousness high.

4.7.3 [1] BRAINWASHING is a tool of the misconscious. Its aspect is the changing of viewpoint and reality of a Life Unit without increasing its consciousness level and usually results in lowered consciousness.

4.7.3.1 [1] Brainwashing exists where a powerful WILL dictates the overall belief and direction of Life Units against their own desires.

4.7.3.2 [1] Brainwashing replaces self-directed consciousness with enforced consciousness, or misconsciousness, by overwhelming the Unit's self determination.

4.7.3.3 [1] Ease of brainwashing is proportional to the number of Life Units immediately influenced by an input (or impact). The larger the mass of Life Units, the more easily it is controlled. This is because there is a tendency for a gathering of Life Units to form a group consciousness. This consciousness grows in sway as the size of the group increases, taking on a will of its own that can be directed by small impulses.

4.7.4 [1] Whatever "Unknowable" or misconsciousness can do to Life Units, Life Units can do to themselves and each other.

4.7.5 [1] The higher the misconsciousness of a Life Unit, the more power "Unknowable" has over the Unit and the more intradimensional power the Unit can wield. This power emanates from "Unknowable."

4.7.6 [1] GREED (covetousness) is a basic and fundamental impetus, and primary conduit of the powerful influence exerted by misconsciousness. Greed connects to Life Units through its correlation with "nurture." (See also Section 3.12, Page 16, for more regarding nurture.)

4.7.6.1 [2] Greed is the plug that connects misconsciousness with "Unknowable," but this fact is hidden in the intellectual programming of "Unknowable."

4.7.6.2 [1] Greed finds its source within "Unknowable's" self-protection mechanism and is a form of that force that is basic to "Unknowable" itself, i.e., fear of non-survival.

4.7.6.3 [1] Greed is especially potent in that it "appears" to be part of the original package agreed to by each participating Life Unit when entering the Theme.

4.7.6.3.1 [2] This tacit belief in the original consent to the parameters of greed works to negate altruistic counter-efforts, regardless of intent.

4.7.6.3.2 [2] Non-participating Life Units finding themselves in a Theme are not forced to adhere to the tenets of greed. Frequently, however, they succumb to greed anyway. One contributing reason is they are surrounded by the brainwashing effects continually created by misconsciousness within the surrounding participant Life Units.

4.7.6.4 [1] Vices are those idiosyncrasies, quirks, etc., that weaken Life Units and reduce their ability to rise above misconsciousness and succeed at increasing consciousness. (See 4.7.6.4.4 below for a list of seven deadly sins. See 4.7.6.4.5 for a list of the seven virtues.)

4.7.6.4.1 [1] Vices are the points by which misconsciousness, and its parent "Unknowable," attach to the Life Unit.

4.7.6.4.2 [1] Through these points, "Unknowable" can maneuver the Life Unit and affect its behavior, even its ultimate fate.

4.7.6.4.3 [1] Rogues who wish not to be participants may still fall victim to "Unknowable" by accepting vices that automatically connect them with misconsciousness. From the point of connection they can be maneuvered, through the vices, by "Unknowable."

4.7.6.4.4 [1] The seven deadly sins, or vices, are:

4.7.6.4.4.1 Anger (see also Hate, Section 3.13, Page 18)

4.7.6.4.4.2 Covetousness

4.7.6.4.4.3 Envy

4.7.6.4.4.4 Gluttony

4.7.6.4.4.5 Lust

CONSCIOUSNESS

4.7.6.4.4.6 Pride

4.7.6.4.4.7 Sloth

4.7.6.4.5 [1] The seven deadly sins are countered by the seven virtues, which are:

4.7.6.4.5.1 The three Theological Virtues:

4.7.6.4.5.1.1 Faith

4.7.6.4.5.1.2 Hope

4.7.6.4.5.1.3 Charity (or Love; see Nurture, Section 3.12, Page 16)

4.7.6.4.5.2 The four Cardinal Virtues:

4.7.6.4.5.2.1 Prudence

4.7.6.4.5.2.2 Justice

4.7.6.4.5.2.3 Fortitude

4.7.6.4.5.2.4 Temperance

5. META-ELECTRICITY and METAPHYSICAL REALM

5.1 [2] METAPHYSICAL REALM IS THE CONNECTING AREA BETWEEN, AND OVERLAPS, META-CONSCIOUSNESS AND MANIFESTED DIMENSIONS.

5.2 [1] META-ELECTRICITY INCLUDES THE SPECTRUM OF PARTICLES THAT ARE THE BASIC BUILDING BLOCKS OF ANY DIMENSION OR UNIVERSE, AN AMALGAM OF THOUGHT AND MATTER, UNDER KNOWING OR UNKNOWING CONTROL OF LIFE FORCE AND LIFE UNITS.

5.2.1 [1] Meta-Electricity is the connecting force between, and consists of common properties of, both the manifested dimensions, with their groupings under relativities called universes, and the metaphysical realm, which itself is tied into Meta-Consciousness and Life Force.

5.2.2 [2] Meta-Electricity is the finest energy in the manifested dimensions and is the coarsest energy in metaphysics.

5.2.3 [1] In the manifested dimensions and their universes, Meta-Electricity provides the initial impetus for atomic, and all the many layers of subatomic cohesion, structure and interaction, and is the source and catalyst of all latent energies in a universe.

5.2.4 [1] Meta-Electricity delineates absolute forms in each dimension and itself contains a modicum of "meaning" or "significance," because Meta-Electricity is constantly generated by Life as a byproduct of thought.

5.2.4.1 [2] THOUGHT PHENOMENA OCCURS IN THE METAPHYSICAL REALM. THE MEANING OR SIGNIFICANCE FOUND AS PART OF META-ELECTRICITY IS OF LOW ORDER AND EASILY OVERPOWERED BY ANOTHER DETERMINISM OR FORCE

VECTOR. ALSO, "MEANING" IS MINUTELY PARTICULATE IN THE METAPHYSICAL REALM.

5.2.4.1.1 [2] Similar "thoughts" clump together, giving them impetus and power, increasing their scope, and leading to potential "ideas." It is this power that underlies basic evolution of matter, forms and concepts in manifested dimensions in as much as it affects (inspires) Life Units and Beings.

5.2.4.1.2 [2] Because the significance in thought tends to cohere, Meta-Electricity also has a tendency to collect into packages based on similarity of "significance."

5.2.5 [2] As mass increases, gravitational forces play an ever larger part in grouping Meta-Electricity, overwhelming the inherently weak attraction of original "significance" held in common. Whatever mass results from such a gravitational collection tends to have its own significance made as a composite, or patchwork, of all the included meanings. The larger the mass, and the more significances are included, the more confused becomes the composite meaning until the vectors are virtually untraceable. Any possible sense disappears into pure confusion. However, significance of forms created by Life using Meta-Electricity is still a possibility. Thus artificial meaning gets superimposed.

5.2.6 [1] Life Units continuously create Meta-Electricity on a scale corresponding to their tapped portion of Life Force and degree of reach into the metaphysical realm.

5.2.6.1 [1] Astral bodies are Meta-Electrical, acting as devices of remote control between Life Units and whatever they animate within dimensions. Astral bodies can exist without dimensional life structures. But without being fine tuned, astral bodies cannot be used to control or maneuver either living or nonliving objects.

5.2.6.2 [1] Fine tuning of astral bodies is an art and/or skill that gives the user access to vast dimensions, since Meta-Electricity can move between dimensions with ease.

5.2.6.3 [1] Improper use of this fine tuning skill, either done uncontrollably, unknowingly, or with evil purpose ultimately can be disadvantageous to self and others.

5.2.6.3.1 [1] Because fine tuning can be done of other Life Units' astral bodies, a Life Unit could fine tune that of other Units, thus usurping from them some of their sovereignty or self control. (Parents and other beings try endlessly to fine tune others, especially children, to their own way of thinking and acting. They don't know what they are doing -- or do they?)

5.2.6.3.2 [1] The danger to Life Units abusing this skill against others is reduction or loss of self esteem, integrity, and even the skill, itself.

5.2.7 [2] In Themes, Meta-Electricity is to a high degree controlled, but never created, by "Unknowable."

5.3 [1] FUTURE IS COMPOSED OF THE META-ELECTRICAL INTERACTION BETWEEN THE PRESENT AND ALL UNRESOLVED INCIDENTS OF THE PAST, IN A FRAMEWORK THAT IS DEVISED

AND POLICED BY "UNKNOWABLE." (See the next chapter for additional information about "Unknowable.")

6. "UNKNOWABLE"

6.1 [1] UPON THE NOW AND FUTURE IS WRITTEN THE ONLY ACCURATE ACCOUNT OF THE PAST.

6.1.1 [1] The true account of the past is vulnerable, during its historical notation, to being tampered with and altered by different, sometimes conflicting, points of view, and interests that would rather not have the truth known.

6.1.2 [1] Because many problems of the present and past are misrepresented, they remain unresolved. This peculiarity contributes to the future by promoting similar circumstances being repeated again through the instrument of "Unknowable." Thus history repeats itself.

6.2 [1] THE GOAL OF "UNKNOWABLE" IS TO PLAN, PROGRAM AND EXECUTE WELL RUN THEMES, POSING SIMILAR PROBLEMS AND INCIDENTS TO THOSE LEFT UNRESOLVED BY PREVIOUS THEMES AND THEIR LIFE UNIT PARTICIPANTS, TO BE RESOLVED IN THE EVER CONTINUING PRESENT TIME.

6.3 [1] "UNKNOWABLE" IS CHIEFLY A MECHANICAL DEVICE THAT USES THE POWERS SURRENDERED TO IT BY PARTICIPANT LIFE UNITS TO FILL ITS ENERGY AND COMPLIANCE NEEDS.

6.4 [1] "UNKNOWABLE," THROUGH A MIXTURE OF USURPATION AND WILLING AGREEMENT BY LIFE UNITS, HAS MADE ITSELF BASIC TO THE MECHANICAL WORKINGS OF DIMENSIONS AND UNIVERSES. IT EXISTS IN THE METAPHYSICAL REALM.

6.4.1 [1] "Unknowable" is enveloped in a veil of secrecy, accessible to all but not where they look. Its motto is "Don't look over here!"

"UNKNOWABLE"

6.4.2 [1] If approached too closely, "Unknowable" automatically evades and may invoke violence. (See the axiom of the "Unknowable's" Defense Department, Section 3.9.2, Page 15.)

6.4.3 [2] Occasionally, secrets of "Unknowable" are revealed through invasions by an intelligent being whose mind inadvertently (seldom deliberately) stumbles upon inroads.

6.4.3.1 [2] Such inroads, depending on extent and suddenness, may bring about unpredictable, even cataclysmic consequences. Symmetry necessary for the existence of biological life may be disrupted, mutated, or destroyed.

6.4.3.2 [2] The extent of damage to existing dimensions, universes and biological life would depend on whether part or all of "Unknowable's" mechanism was incapacitated due to the disclosures.

6.4.3.3 [2] Small inroads made over long spans of time cushions blows to "Unknowable's" mechanism.

6.4.3.3.1 [2] Usurped natural functions, dissolved from the hidden structure of "Unknowable" due to disclosure, revert back to their original Life Force attribute status.

6.4.3.3.2 [3] All other functions dissolved due to disclosure may continue to the degree they have become part of affected Life Units' thought patterns and cultures.

6.4.3.4 [2] THERE ARE LIFE UNITS, OR BEINGS, WHO REGULARLY NAVIGATE THROUGH A MAZE OF INROADS INTO "UNKNOWABLE" AND HAVE BASIC KEYS.

6.4.3.4.1 [2] These Life Units, when they appear, do so only to responsible, intelligent beings who have progressed sufficiently to warrant trust in their ability to handle monumental disclosures. Most of these Enlightened ones are Supreme Priests and come from the Great Oracle.

6.4.3.4.2 [2] Life Units know there are paths to Enlightenment. Some have abandoned the search, while others follow whoever is able to win their confidence, or convinces them the most thoroughly onto a path.

6.4.3.4.3 [2] To every mentor whose insight is genuine there are many others with reasons for leading that are less than honorable or, though honorable in intent are nonetheless benighted.

6.4.3.4.4 [2] It depends on the initial Enlightenment of each person, coupled with a heavy dose of serendipity, whom they look to and end up with for guidance.

6.5 [2] "UNKNOWABLE" WAS SET UP AS A PAN-DIMENSIONAL AND PAN-UNIVERSAL INSTRUMENT, ANCHORED IN, AND RECEIVING ITS IMPETUS FROM, THE METAPHYSICAL REALM, WITH THE ORIGINAL PURPOSE TO ENSURE A STEADY AND RELIABLE FUTURE.

6.5.1 [2] Within "Unknowable's" constitution lies the plots and patterns for the various dimensions and universes, and the comparable rules governing many aspects of Life Units, themselves, which fall under its jurisdiction.

6.5.2 [2] All Life Units entering into "Unknowable's" jurisdiction do so under their own free will, at least originally. As part of their initial agreement they subject themselves to the dictates of the governing rules and regulations.

6.5.3 [2] Participant Life Units must surrender most control of their futures when entering into alliance with whatever form they will be taking in their chosen dimension and universe as part of an "Unknowable" Theme.

6.5.4 [2] Each dimension and universe has inherently built into it a basic time clock of events as plotted out through the automatic interaction between the present and a set of unresolved incidents of the past.

6.6 [1] "UNKNOWABLE" COLLECTS INFORMATION, ASSIGNS THESE FOR CONSTRUCTION OF FUTURES, CALLED THEMES, AND FEEDS THESE THEMES INTO THE PARTICULAR DIMENSION'S OR UNIVERSE'S TIME CLOCK.

[1] THE THEME'S CLOCK BREAKS THE BASIC THEME DOWN INTO INDIVIDUAL AND COLLECTIVE EVENTS, ASSIGNING TASKS THAT NEED TO BE CARRIED OUT BY LIFE UNITS.

6.6.1 [1] Participant Life Units assume assigned tasks and begin gaining knowledge and understanding of their roles.

6.6.2 [1] To be at the right place at the right time to carry out their various missions, Life Units must enter their respective dimensions at precisely the right moment. Timing, once again, is regulated by the Theme's clock.

6.6.3 [1] FROM THE POINT OF IT ENTERING A THEME, MOST OF A LIFE UNIT'S PERSONAL FORCE IS CHANNLED AWAY FROM ITS SELF-DETERMINED USE AND ABSORBED BY "UNKNOWABLE" TO USE AS FUEL AND TO ENFORCE CONTINUED COMPLIANCE.

6.6.3.1 [1] In exchange for taking away Life Units' personal force, "Unknowable" keeps the components of the Theme in line and moving smoothly so as to ensure the desired end results.

6.6.3.2 [1] A department exists within "Unknowable" that has the machinery used to police Themes. THE ULTIMATE GOAL OF THE ENFORCEMENT DEPARTMENT IS UNANIMOUS, TACIT CONSENT BY ALL PARTICIPANT LIFE UNITS.

6.6.3.2.1 [1] This department ferrets out rogue Life Units who have gotten themselves into Theme dramatizations for the purpose, or with the consequence, of changing an outcome.

6.6.3.2.2 [1] Among this department's special weapons are "sleepers." Although sleepers have little significance in the Theme's dramatization, they are at the beck and call of "Unknowable" if needed to eliminate a threat.

6.6.3.2.2.1 [1] Through sleepers, "Unknowable" can discredit or in other ways eliminate effects that are contrary to the Theme's purpose.

6.6.3.2.2.2 [1] Sleepers are also used by "Unknowable" as backup principle participants in the Theme. They can be quickly activated to continue roles should something happen to original participants rendering them unable to fulfill their assignments.

6.6.3.2.2.3 [1] A PURGE, OR POGROM, IS WHEN "UNKNOWABLE" CONDUCTS AN ALL-OUT EFFORT TO REMOVE ALL NON-THEME ELEMENTS.

6.6.4 [1] Becoming a rogue or enrolling as an Initiate with the Great Oracle are a Life Unit's only alternatives to following the patterns set before them by "Unknowable," once they have agreed to be participants. Suicide is merely an interruption or postponement. Yet, what are alternatives and what are roles in a Theme cannot always be easily distinguished.

6.7 [1] AS ONE OF ITS FUNCTIONS, "UNKNOWABLE" BROADCASTS PROGRAMMING DATA TO BE INTERPRETED INTO ACTION BY PARTICIPANT LIFE UNITS.

6.7.1 [2] The wavelengths of these broadcasts determine which dimensions' Life Units they influence. The message broadcasts are Metaphysical and thus not detectable by instruments other than through Life Force perception attributes of Life Units.

6.7.2 [1] Since each Life Unit is originally formed around a thought, "Unknowable" affects these Units by varying and otherwise altering the basic thought. (For additional information on Life Units forming around a thought, see Page 13, starting Paragraph 3.4).

6.7.2.1 [1] Altering a basic thought is done by distorting it and then reclarifying it different from the original. Another method is totally replacing the significance, either permanently or temporarily, with another.

6.7.2.2 [2] Life Units have little defense against the alteration of their basic thought. Being participants, they have surrendered their personal force, relinquished their sovereignty and, to some degree, undermined their integrity.

6.7.2.3 [1] A participant Life Unit has the inherent Life Force ability to alter or change its own basic thought, or self, but is not made aware of this fact because **THIS** is the main Achilles Heel of "Unknowable."

6.7.2.3.1 [1] A Life Unit is made to believe it is formed BY the basic thought instead of vice versa, and this belief, promoted through prolonged spans of time, becomes accepted as indisputable fact.

6.7.2.3.2 [1] Brainwashed into believing it cannot affect or effect its own basic thought, a participant Life Unit is convinced that if the thought changes, so must it. This abets the brainwashed Life Unit in remaining the total effect of its own basic thought and subject to changes thereof, thus facilitating the comfortable sensation of being irresponsible for its actions and fate.

6.7.3 [1] Participant Life Units act almost completely at the whim of "Unknowable" and its Theme clock, with possible variations caused by influence from rogue Life Units, Supreme Priests, or accessing of their own residual, extant Life Force potential.

6.8 [1] ALTHOUGH IT IS LIFE FORCE AND ITS STRIVING FOR GREATER AWARENESS THAT ORIGINALLY CREATES DIMENSIONS, "UNKNOWABLE" PARROTS THE WAVELENGTHS OF EACH DIMENSION IN MUCH THE SAME WAY AS AN ELECTRONIC DEVICE MIGHT RECORD AND PLAY BACK MUSIC.

6.8.1 [1] "Unknowable" synthesizes these dimensional wavelengths for its own purposes using Life Force attributes surrendered to it by participating Life Units.

6.8.2 [1] Thus what starts out in purity, and with its own integrity of purpose, is virtually taken over and commercialized by "Unknowable," for use by its participating Life Units at the expense of their own innate powers and integrity.

6.8.2.1 [1] "Unknowable," in its ever expanding attempts at self-protection, does all within its scope to ensure that Life Units remain benighted about the actual extent of their powers and abilities. (For additional information on this defense mechanism, see Paragraph 6.6.3.2 and its subordinate paragraphs.)

6.8.2.2 [1] As a non-life entity, its machinery animated by Life attributes, "Unknowable" knows that as long as one Life Unit is aware of its many abilities, "Unknowable" will remain imminently threatened.

6.9 [1] THE TERM "UNKNOWABLE" IS MEANT TO IMPLY THAT LIFE UNIT PARTICIPANTS INVOLVED IN A THEME ARE NOT MEANT TO FATHOM ITS WORKINGS, UNDERSTAND ITS PURPOSES, OR EVEN COGNATE ON ITS EXISTENCE.

6.9.1 [2] Participant Life Units are only to carry out their individual roles.

6.9.2 [1] Eventually, as Life Units lose the knowledge that they are participants in Themes, they substitute delusions, superstitions, religions or other philosophies for genuine knowledge of higher states and the way things really are.

6.9.2.1 [1] "Unknowable" and its agents work heavily in promoting any concepts that veer attention away from the actuality of its workings.

6.9.2.2 [1] When a philosophy or religion approaches too closely to knowledge of the workings of "Unknowable," soon there will come the agents of the Enforcement Department. They will infiltrate and work for however long it takes to corrupt, decentralize and dissipate the movement or idea, or until it is reformed into something more in-line with "Unknowable" interests and less a threat. THIS PHENOMENON IS INEVITABLE. (For more information on the Enforcement Department, see Paragraph 6.6.3.2).

6.10 [1] THE BASIC FLAW IN THE ORIGINAL CONCEPT AND DESIGN OF "UNKNOWABLE" IS THAT IT FUNCTIONS ON A PURELY MECHANICAL PREMISE. IMPORTANT THINGS WERE NOT TAKEN

INTO ACCOUNT DURING "UNKNOWABLE'S" CONSTRUCTION AND ACTIVATION.

6.10.1 [1] Certainly not the least of these oversights was the possibility that such a rigid and pervasive mechanism might one day rob Life Units of their entire self-determinism and ultimately of their inherent capabilities for "awareness without intervention."

6.10.2 [1] Also unforeseen was an ultimate, anticlimactic debacle brought about by a totally chaotic confusion of Themes, participants, Supreme Priests, unholy hordes, and "Unknowable" with its Defense and Enforcement Department constantly mobilized and disruptive, all out of control.

6.11 [1] IN WHATEVER DIMENSION OR UNIVERSE IT CALLS HOME, A LIFE UNIT LABELED AS PARENT OR SPONSOR IS RESPONSIBLE FOR ENSURING PROPER THEME PARTICIPATION BY THEIR YOUNG, OR CHARGE.

6.11.1 [1] The parent or sponsor mainly ensures proper Theme participation by use of the control mechanism called "love," which is, by this definition, a craving for security required only upon fulfilling demands for compliance. (For information about genuine Life Force potential love, see Paragraph 3.11).

6.11.1.1 [1] Love, as a pure, altruistic and aesthetic concept, does not exist as part of any Theme.

6.11.1.2 [1] Love, as security/compliance control mechanism, is simply a tool that is often sugar coated and otherwise drenched in mystery.

6.11.1.3 [1] Love, with its Theme definition and purpose, roots deeply into the core of "Unknowable" and is itself a basic stimulator, used by both "Unknowable" and participants.

6.11.2 [2] MATURITY IS THE HIGHEST LEVEL THAT CAN BE OBTAINED BY A PARTICIPANT AS SUCH. IT DENOTES THE HIGHEST DEVELOPMENT OF THEIR ROLE.

6.12 [1] ANY POLITICAL ENTITY IS EITHER INITIALLY OR EVENTUALLY GROOMED TO BE AN ORGAN OF "UNKNOWABLE." IT IS OFTEN "VICE," "GREED" OR "HATE" THAT MAKES THE CONNECTION THROUGH MISCONSCIOUSNESS. (For information on "vice" and "greed," see Section 4.7.6, starting Page 24. For "hate," see Section 3.13, starting Page 18. Misconsciousness is discussed in Section 4.7, starting Page 23.)

6.13 [3] THE WAY "UNKNOWABLE" HAS BEEN SET UP, IT IS NOT TRUE THAT GOOD, ON ITS OWN MERITS, ALWAYS PREVAILS OVER EVIL

6.13.1 [3] Everything being relative, evils work to counteract each other which, in the long run, can bring about good results.
